

Alexander Genin

Frontend Software Engineer: React and Node

I have **3 years of experience** developing robust web apps. I mostly work with the frontend. I've taken part in the development of both small startups and large high-load projects.

EXPERIENCE

Middle Software Engineer, *EPAM Systems*

December 2021 - July 2022

- Early developer at a high-load product-oriented B2B project (a monorepo with 150 contributors) of a large Belgium company
- Provided high unit test coverage (> 80%)
- Implemented critical functionality for viewing invoices table
- Was assessed as close-to-senior developer by project manager based on my performance
- Provided feature demo for the team of 50 frontend engineers from other teams
- Implemented reusable Storybook components for the design system
- Worked in a multicultural team of 20 and received positive feedback from teammates
- Took the initiative to migrate dependency library to 3 times more lightweight alternative
- Contributed to multi-language support as well as customization of the project for three regions: North America, Europe and Asia

Technologies: TypeScript, React, Redux, Jest, Testing Library, Material UI, Storybook, Nx

Full Stack Web Developer, *Upwork*

June 2020 - December 2021

- Designed the architecture and shipped several projects based on clients' requests
 - Communicated and discussed product requirements directly with clients
 - Received 5-star reviews with positive feedback
- Created stocks market app with charts and live data streaming
 - Complex UI with menus, tables and charts using React, Chart.js and Styled Components
 - Data search functionality for various stocks achieved with Yahoo Finance API, Node.js and MongoDB
- Restaurant reservation system
 - Design of system structure and business logic with JavaScript
 - Public UI with HTML, CSS, Sass, Bootstrap
 - Shipping the system increased daily number of reservations by 20%
- Created QR-code based waiter calling system
 - Implemented unique UI/UX design
 - Added custom audio notifications

Technologies: JavaScript, React, Node, HTML, CSS, JQuery, PHP, MySQL, MongoDB

Full Stack Web Developer, *ThemeForest by Envato*

September 2019 - June 2020

- Developed portable UI/UX themes with multi-language support from scratch
- Designed and implemented the projects (both frontend and backend) and connected them to database
- Implemented complex CSS and JavaScript animations
- Drastically improved the website initialization time for customers

Technologies: JavaScript, React, JQuery, HTML, CSS, PHP, MySQL

EDUCATION

Master's Degree in Chemical Engineering

Moscow State University

GPA 5.0 / 5.0
